

It is now more than 50 years since the first Megator pumps were used in the railway industry. Since then Megator pumps have been used in increasing numbers and on an ever widening variety of duties. In every case one or more of the outstanding features of the Sliding Shoe pump have influenced their selection for the duty;

- > Self-priming
- > Operates with dry suction
- > Simple to install
- > High suction lift
- > Constant capacity at varying heads
- > Single cover access
- > Simple to operate
- > Self compensating for wear
- > The same pump for water and oils
- > Remove the last drop from containers
- > Minimal shear/emulsification
- > Simple to maintain

Typical Applications

- > Diesel Fuel Dispensing
- > Waste Oil Removal
- > Sump Drainage
- > Wash Down Water Run Off
- > Engine Coolant
- > Lubricating Oil Dispensing
- > Sludge Removal
